

Healthcare savings without the hassle

All flexible spending plans are not the same. Clarity's FSA gives employers and employees the tax savings they expect—plus a simple, stress-free experience that only we can offer. Our program is easy to administrate, simple to use, and automates the entire process.

A simply smarter FSA

We connect to your payroll provider and benefits administration platform to automatically update all enrollments, terminations, and deposits. Our platform also connects to consumers' insurance carriers, automatically substantiating card swipes and eliminating the need for receipts or EOB statements.

Service you can count on

Every client and broker will receive dedicated support from a Client Relationship Manager with at least five years of benefits experience. Employees can always get the help they need, with service available in over 80 languages.

Technology that actually works

With our smart debit card, online portal and mobile app, and ability to connect with insurance carriers, payroll, and benefits administration platforms, we have created a seamless, more intuitive experience for all.

Simpler

Everything you need to make the most of your FSA

- Smart debit card
- Mobile app
- Text alerts
- Self-service portal and online enrollment
- Superior technology that connects to any insurance carrier automating the claims process
- Best-in-class service and support

A simple way to cover healthcare costs

A Flexible Spending Account (FSA) allows participants to set aside pre-tax dollars for healthcare expenses—saving employees an average of 20–40% on taxes, and employers 7.65% on every dollar contributed.

Let's talk about getting the most from your benefits
